

CURRICULUM VITAE

TAHIYAT AHMED

- Location: 152/Ka/b, Asha Goli, Shyamoli Road 2, Dhaka-1207, Bangladesh
- Mail: tahiyat.ahmed703@gmail.com
- Github: <https://github.com/nirjhor703>
- Portfolio: <https://tahiyat.netlify.app/>
- Linkedin: <https://www.linkedin.com/in/tahiyat-ahmed/>
- Phone: +8801858937859

CAREER OBJECTIVES

Full-Stack Developer and Automation Engineer experienced in building AI-powered workflows, ERP systems, and scalable web applications using Django, Laravel, and n8n. Skilled in integrating OpenAI, Gemini, and voice AI APIs, with hands-on production deployment on Ubuntu VPS environments. Focused on intelligent automation, backend architecture, system optimization, and reliable production ready software solutions.

AREA OF EXPERTISE

- ✓ **Frontend:** HTML5, CSS3, JavaScript, Bootstrap
- ✓ **Backend & Programming:** PHP (Laravel), Python (Django), Node.js, C++
- ✓ **Databases:** MySQL, PostgreSQL, SQLite
- ✓ **Automation & AI:** n8n workflow automation, OpenAI & Gemini API integration, ElevenLabs voice AI, prompt engineering, Google Sheets API, business process automation
- ✓ **Version Control & Tools:** Git, GitHub, VS Code, PyCharm, XAMPP, Visual Studio, n8n
- ✓ **Core Strengths:** Advanced problem solving, system integration, automation architecture, scalable backend design

PROFESSIONAL EXPERIENCE

Software Developer

Team Solution Bangladesh (TSBD), Dhaka, Bangladesh

Jan 2026 - Present

- Developed and maintained ERP modules using Django and Laravel, implementing full CRUD functionality for real-world business operations.
- Designed and developed REST APIs and worked with MySQL and PostgreSQL databases to support application functionality, data integrity, and performance.
- Contributed to the development and migration of large-scale ERP systems, focusing on scalability, maintainability, backend architecture, and cleaner system structure.
- Deployed and managed production applications on Ubuntu VPS environments using Apache, including server configuration, troubleshooting, and production maintenance.
- Developed attendance and workforce management solutions with real-time tracking, automation, and centralized operational workflows.
- Worked on system integration, database management, debugging, optimization, and production-level software maintenance to deliver reliable solutions.

Junior Software Developer

Team Solution Bangladesh (TSBD), Dhaka, Bangladesh

Oct 2025 - Dec 2025

- Developed and maintained ERP modules using Django and Laravel with full CRUD functionality.
- Designed and implemented transaction-related features for ERP operations, including new and existing purchase workflows.
- Built and integrated REST APIs and worked with MySQL and PostgreSQL databases.
- Performed debugging, database optimization, and backend improvements to enhance application reliability and performance.
- Deployed and managed applications on Ubuntu VPS using Apache and assisted with server-side troubleshooting.

Junior Software Developer (Intern)

Team Solution Bangladesh (TSBD), Dhaka, Bangladesh

Jul 2025 - Sep 2025

- Assisted in developing ERP and business application modules using Django and Laravel.
- Worked with REST APIs, MySQL, PostgreSQL, and basic database operations.
- Participated in debugging, testing, and Git-based team collaboration.
- Gained hands-on experience with real-world software development workflows and production-oriented projects.

EDUCATIONAL QUALIFICATION

Bachelor of Science in Computer Science and Engineering

American International University-Bangladesh (AIUB)

2025

CGPA: 3.53

Major in Software Engineering

Higher Secondary School Certificate

Cambrian College

2020

GPA: 4.83

Group: Science

Secondary School Certificate

Monipur High School and College

2018

GPA: 4.78

Group: Science

PROJECTS

Quantum Attendance System - Office Project

Django, PostgreSQL, Automation, Real-Time Systems | [Live Demo](#)

- Developed a production-grade attendance and workforce management system with real-time tracking across multiple locations.
- Implemented automated attendance processing, workforce monitoring, participant management, and centralized operational features.
- Worked on backend workflows, database integration, real-time updates, deployment, and production maintenance.

ERP Management System - Office Project

Laravel, MySQL, ERP, phpMyAdmin | [Live Demo](#)

- Contributed to a large-scale ERP system managing pharmacy inventory, clinic operations, transactions, and practical reporting.
- Developed and maintained business modules with CRUD operations, database integration, and backend functionality.
- Worked with high-volume transactional data and real-world business workflows to support daily operations.

GhostRoom - Anonymous Chat System

Django, WebSocket, Redis, Real-Time | [Live Demo](#)

- Developed a real-time anonymous chat application with temporary rooms, invite-based access, and generated usernames.
- Implemented WebSocket communication for live messaging and Redis-backed real-time operations.
- Added expiring sessions and temporary room behavior to support privacy-focused anonymous conversations.

Health-Doc Virtual Assistant

Django, Gemini AI, OCR, AI Chat | [Live Demo](#)

- Built an AI-powered assistant for analyzing uploaded PDF and image-based medical reports.
- Integrated Gemini AI and OCR to generate simplified report explanations and report-based answers.
- Implemented document upload, contextual AI chat, and structured features to help users prepare for doctor consultations.

Bili.com - Smart E-Commerce Platform

Django, Python, MySQL, AJAX, Bootstrap 5, REST API | [Live Demo](#)

- Developed a commerce platform for product, inventory, supplier, order, invoice, and fulfillment management.
- Implemented centralized order processing and inventory tracking with dynamic AJAX-based interactions.
- Built REST API integrations and database-driven business workflows using Django and MySQL.

EXTRA-CURRICULAR ACTIVITIES

✓ Enumerator, Economic Census 2024 - BBS

Collected and recorded economic data with accuracy and professionalism while following assigned survey procedures and deadlines.

✓ Enumerator, Population & Housing Census 2022 - BBS

Conducted field surveys, ensured accurate reporting, and met daily targets while collaborating with the assigned census team.

INTERESTS

Football, Travelling, Billiards, Bodybuilding
